

MPI TS2000-IFE Series | 200 mm Automated Probe Systems

The Dedicated System for mmW, Load-pull, SiPH and Product Engineering

FEATURES / BENEFITS

Designed for Variety of On-Wafer Applications

- DC-IV / DC-CV / Pulsed-IV applications
- Silicon photonics
- RF, mmW, load-pull applications & 4-port setup
- IC Design Validation, Failure Analysis in wide temperature range from -60 to 300 °C
- Wafer Level Reliability

Extended Flexibility

- MPI IceFreeEnvironment™ for using MicroPositioners and probe cards simultaneously, even at negative temperature
- Programmable microscope movements for more automation and ease of use
- The shortest cable interface to IC tester
- Minimize the platen-to-chuck distance for mmW & probing with active probes
- Supports film-frame probing

Ergonomic Design and Footprint

- Easy wafer or single DUT loading from the front
- Integrated active vibration isolation
- Completely integrated prober control for faster, safer and convenient system and test operation
- The Safety Test Management (STM™) with automated dew point control
- Reduced footprint due to smart chiller space arrangement
- Instrument shelf option for shorter cables and higher measurement dynamic

STAGE SPECIFICATIONS

Chuck XY Stage (Programmable)

Travel range	220 x 490 mm (8.66 x 19.29 in)
Resolution	0.2 µm
Accuracy	± 2.0 µm (0.08 mils)
Repeatability	± 1 µm
XY stage drive	Closed-loop high precision stepper motors
Speed*	Slowest: 10 µm / sec Fastest: 50 mm / sec

Chuck Z Stage (Programmable)

Travel range	30 mm (1.18 in)
Resolution	0.2 µm
Accuracy	± 2.0 µm
Repeatability	± 1.0 µm
Z stage drive	Closed-loop high precision stepper motor
Speed*	Slowest: 10 µm / sec Fastest: 20 mm / sec
Guider	Precision ball bearings

*The speed is instantaneous speed, not average speed. There is accelerate and decelerate time when moving.

STAGE SPECIFICATIONS

Chuck Theta Stage (Programmable)

Travel range	$\pm 5.0^\circ$
Resolution	0.0001°
Accuracy	< 2.0 μm (measured at the edge of the 200 mm chuck)
Repeatability	< 1.0 μm
Theta stage drive	High resolution stepper motor with linear encoder feedback system

MICROSCOPE MOVEMENT

	XYZ Programmable	XY manual, Z programmable	XYZ manual
XY - Travel range	50 x 50 mm* / 100 x 50 mm / 200 x 200 mm	50 x 50 mm / 80 x 80 mm	50 x 50 mm / 100 x 100 mm
Resolution	1 μm (0.04 mils)	< 5 μm (0.2 mils)	< 5 μm (0.2 mils)
Repeatability	< 2 μm (0.08 mils)	N/A	N/A
Accuracy	< 5 μm (0.2 mils)	N/A	N/A
Z - Travel range	140 mm	140 mm	140 mm, pneumatic
Resolution	0.05 μm (0.002 mils)	0.05 μm (0.002 mils)	N/A
Repeatability	< 2 μm (0.08 mils)	< 2 μm (0.08 mils)	< 2 μm (0.08 mils)
Accuracy	< 4 μm (0.16 mils)	< 4 μm (0.16 mils)	N/A

*Heavy duty version for laser cutter option available

XYZ programmable movement

Large Probe Platen supporting up to 10x DC or 4x DC + 4x RF MicroPositioners or standard 4.5" probe card holder

PROBE PLATEN

Specifications

Material	Nickel plated steel
Chuck top to platen top	Min. 28 mm
Platen cooling	Fully integrated CDA cooling, by using the chiller CDA
Configuration	Probe card holder 4.5 x 11" and/or MicroPositioners
Max. No. of MicroPositioners	10x DC MicroPositioners or 4x DC + 4x RF MicroPositioner Setup
RF MicroPositioner mounting	Magnetic with guided rail
DC MicroPositioner mounting	Magnetic

KEY FEATURES

IceFreeEnvironment™

MPI IceFreeEnvironment™ provides unique capability to perform measurements with probe cards and MicroPositioners simultaneously, especially at negative temperatures down to -60 °C.

Internal node probing with active/passive high impedance probes is very convenient.

The optimized design with minimal tip drop for highest dynamic range and gamma of mmWave and Load Pull measurements make the system an ideal choice for RF/mmW applications on 200 mm wafers.

Manual Wafer Loading

Loading or unloading of wafer up to 200 mm or substrates is straight forward and intuitive. Special designed chucks allowing easy single ICs or wafer fragments loading in the front. Furthermore MPI SmartVacuum™ technology allows automated wafer size or single Die recognition and protects the wafer in case of power interruptions or inexperienced operators from releasing the vacuum inside the IceFreeEnvironment™.

No roll-out stage allows for a simple method of automation for RF calibration and probe card cleaning. Easy access to the AUX chucks for handling of calibration substrates, cleaning or contact check pads.

Integrated Controls

The thermal chuck can be operated by using the fully integrated touchscreen display, placed at convenient location in front of the operator for fast operation and immediate feedback.

The intelligent hardware control panel is completely integrated into the probe system and is designed to provide faster, safer and convenient system control and test operation.

The Keyboard and mouse are strategically located to control the software and it can also control the Windows® based instrumentation.

USB connection to the systems controller is located right in front for convenient data exchange.

Probe Hover Control™

MPI Probe Hover Control PHC™ allows easy manual control of probe contact and separation to wafer. Separation distance can accurately control with micrometer feedback for probe to wafer/pad positioning. Ease of use guarantees the safest operation by minimizing error during critical set-up and probe change operations.

Minimized CDA Consumption

With the ERS patented technology, using the chiller for purging the IceFreeEnvironment™, the CDA consumption is reduced by as much as 50%. Nitrogen purging is also possible by using separate, automated valve.

This “refurbished” CDA is used in addition for probe platen and probe card cooling.

* Picture is courteously provided by ERS.

SENTIO® - Probe Station Control Software

MPI automated engineering probe systems are controlled by a unique and revolutionary, multi-touch operation SENTIO® Software Suite – simple and intuitive operation saves significant training time, the Scroll, Zoom, and Move commands mimic modern smart mobile devices and allows everyone to become an expert in just minutes. Switching between the active application and the rest of the APPs is just a matter of a simple finger sweep.

QAlibria® - RF Calibration Software

By implementing intuitive multi-touch operation, QAlibria® provides crisp and clear guidance to the RF calibration process, minimizes configuration mistakes and helps to reach accurate calibration results in fastest time. QAlibria® offers industry standard and advanced calibration methods. QAlibria® includes TOSM (SOLT), TMR, TMRR methods, and 4-port calibration capability additionally to the integration of NIST StatistiCal calibration packages providing easy access to the NIST multiline TRL metrology-level calibration and uncertain analysis.

OPTIONAL FEATURES

DarkBox

DarkBox allows light sensitive measurement capability and in case of TS3000 interlock system for safety measurements up to 10kV and 600A. See all dimensions on the last page.

Vertical Control Environment™ (VCE™)

The VCE™ allows the probing area to be observed from the side for safe operation. It automatically detects the height of the tips and defines the position of the chuck contact. The wizard-guided setup procedure takes into account working with probe cards and DC or RF probes. It saves time during initial contacting and prevents damage to probes or pads, especially in the covered MPI ShieldEnvironment™.

mDrive™

In addition to the standard joystick control, mDrive™ provides a truly intuitive, manual, one or two hands operation of all existing programmable stages, such as chuck, scope or MicroPositioners. X- and Y-axis fine control is available for the selected stage, where Z safety function requires additional enabling.

THZ-Selection

It converts TS2000-IFE system into a dedicated, mmW and THz probe station, as the first one on the market:

- Automated testing of 200 mm wafers with unsurpassed measurement accuracy is possible now
- The MPI THZ-Selection incorporates MPI's innovative design of frequency extender's integration, developed for TS200-THZ, which hovers the extender over the entire 300 mm wafer
- This minimizes the distance to the DUT to a minimum in order to provide best possible measurement directivity and accuracy

ShieldCap™

The ShieldCap™ option converts the TS2000-IFE into a ShieldEnvironment™ system.

The MPI ShieldEnvironment™ is a high performance local environmental chamber providing excellent EMI- and light- tight shielded test environment for ultra-low noise, low capacitance measurements.

MPI ShieldEnvironment™ allows up to 4-port RF or up to 8-ports DC/Kelvin or a combination of those configurations. MPI ShieldCap™ provides easy reconfiguration of measurement setup as well as EMI/noise shielding - which make great difference in simplifying day to day operations.

ShieldEnvironment™ Electrical Specifications*

EMI shielding	> 30 dB (typical) @ 1 kHz to 1 MHz
Light attenuation	≥ 130 dB
Spectral noise floor	≤ -180 dBVrms/rtHz (≤ 1 MHz)
System AC noise	≤ 5 mVp-p (≤ 1 GHz)

*Including 4 MicroPositioners.

Automated Wafer Loading: WaferWallet®MAX

Number of cassettes	1
Cassette type	Semi Standard, opened
Supported wafer sizes	100, 150 or 200 mm
Pre-aligner and cassette scanner	Included
Wafer ID-Reader	Option for top or bottom ID reading Revolutionary integrated RGB illumination Fully automatic exposure control Code shift compensation OCR, Barcode, DataMatrix and QR code
Signal light tower	Four color, LED steady / flashing tower lights

NON-THERMAL CHUCKS

Standard Wafer Chuck

Connectivity	Coax BNC (f)
Diameter	210 mm
Material	Stainless steel
Chuck surface	Planar with centric engraved vacuum grooves
Vacuum grooves sections (diameter)	3, 27, 45, 69, 93, 117, 141, 164, 194 mm
Vacuum actuation	Multizone control - All connected in meander shape, center hole in 3 mm diameter
Supported DUT sizes	Single DUTs down to 4 x 4 mm size or wafers 50 mm (2 in) thru 200 mm (8 in)*
Surface planarity	$\leq \pm 5 \mu\text{m}^{**}$
Rigidity	$< 15 \mu\text{m} / 10 \text{ N @edge}$

*Single DUT testing requires higher vacuum conditions dependent upon testing application.

**By using SENTIO® topography

RF Wafer Chuck

Connectivity	Kelvin Triax (f)
Diameter	210 mm with 2 integrated AUX areas
Material	Nickel plated aluminum (flat with 0.5 mm holes)
Chuck surface	Planar with 0.5 mm diameter holes in centric sections
Vacuum holes sections (diameter)	3, 27, 45, 69, 93, 117, 141, 164, 194 mm
Vacuum actuation	Manual switch between Center (4 holes), 100, 150, 200 mm (4, 6, 8 in)
Supported DUT sizes	Single DUTs down to 4 x 4 mm size or wafers 100 mm (4 in) thru 200 mm (8 in)*
Surface planarity	$\leq \pm 5 \mu\text{m}^{**}$
Rigidity	$< 15 \mu\text{m} / 10 \text{ N @edge}$

*Single DUT testing requires higher vacuum conditions dependent upon testing application.

**By using SENTIO® topography

Auxiliary Chuck

Quantity	2 AUX chucks
Position	Integrated to front side of main chuck
Substrate size (W x L)	Max. 25 x 25 mm (1 x 1 in)
Material	Ceramic, RF absorbing material for accurate calibration
Surface planarity	$\leq \pm 5 \mu\text{m}$
Vacuum control	Controlled independently, separate from chucks

Electrical Specification (Coax)

Operation voltage	In accordance with EC 61010, certificates for higher voltages available upon request
Maximum voltage between chuck top and GND	500 V DC
Isolation	$> 2 \text{ G}\Omega$

Electrical Specification (Triax)

Chuck isolation	Standard Chuck (10 V)
Force to guard	$\geq 1 \text{ T}\Omega$
Guard to shield	$\geq 1 \text{ T}\Omega$
Force to shield	$\geq 5 \text{ T}\Omega$

THERMAL CHUCKS

Specifications of MPI ERS AirCool® Technology

	Ambient to 150 °C	20 °C to 150 °C	Ambient to 200 °C	20 °C to 200 °C
